

GET STEAMED UP AT YOUR WEDDING!

Once the speeches and toasts are over at your wedding reception there is not much else for your guests to do except, perhaps to chat and drink more of your champagne! May we suggest that you entertain both young and old on our miniature railway? We can erect our portable track and run our ride-on steam and diesel powered passenger carrying railway on your reception site. Have a wedding with a difference – get some splendid photographs of the family on a real steam train. Only £200 for two hours of rides.

About us – We the West Wiltshire Society of Model engineers who build our own locomotives and railway track. The miniature railway engines run on real Welsh dry steam coal and will easily pull around eight adults on fairly level ground. The riding cars are of the ‘Saddle’ type and passengers ride astride the track. The track can be erected by our team of 6 volunteers in around one hour.
